

ALIM HASANOV

APPLICATION AND DATA MANAGEMENT | AUTOMATION

PROFILE

Hands-on with application management, automating data flows, and vendor integrations. Mostly you will find me troubleshooting APIs, querying databases, reading logs or debugging a client issue - or tinkering on automating a task. With a get-it-done attitude, I enjoy being the SME and the interface between clients and internal development teams, syncing business needs with IT. I'm in my element tracing bugs, testing new features, automating repetitive tasks with tools like Python, all the while facing clients and keeping them in the loop.

For more details you are welcome to view my personal page: alimhasanov.com

- Turkish (Native)

PROFESSIONAL EXPERIENCE

Self-study

JUN 2025 - PRESENT, ZÜRICH, CH

- Using this transition period to prepare for the Goethe C1 German Exam (Q2 2026), reflecting my personal long-term goal of living and working in Switzerland.

Product Data Specialist FE fundinfo

OCT 2023 - MAY 2025, ZÜRICH, CH

- Developed internal tools for data profiling and quality assessment using Python and SQL
- Automated internal reference data discovery and gathering processes, resulting in:
 - Simplified data access and discovery from multiple sources for internal teams
 - Faster client ticket turnaround times
 - Elimination of duplicate data submission and processing
- Converted an Excel-VBA tool into a modern web UI ([link](#)), resulting in:
 - Reduced client fund data submission errors and fewer support tickets
 - Minimized time spent on expensive manual interventions
 - Improved fund data intake/processing turnaround time
- Guided asset managers on their fund data submission requirements
- Performed SQL- data manipulation, cleansing, and reconciliation
- Tools used: SQL, Python, JavaScript, HTML, Jira, DuckDB

Crypto Trading Support Elwood Technology
