

ALIM HASANOV

APPLICATION SUPPORT | DATA MANAGEMENT & AUTOMATION

PROFILE

I keep businesses running seamlessly and clients confident by managing applications and monitoring logs, databases, APIs, and network connectivity across the software stack. Experienced with data management, data accuracy, and process automation. Also with streamlining and processing of data from multiple sources ranging from APIs to text files and automating the process using tools like Python, SQL, or other as required.

In addition, as a self-taught user of SQL, Python and various IT tools, I naturally bridge the gap between business logic and IT teams. In short, **I convert human-readable data into machine-readable — and vice versa.**

Modus Operandi: diagnose, fix, automate, repeat.

PROFESSIONAL EXPERIENCE

Product Data Specialist

OCT 2023 - MAY 2025, ZÜRICH, CH

[FE fundinfo](#)

- Developed internal tools for data profiling and quality assessment using Python and SQL
- Automated internal reference data discovery and gathering processes, resulting in:
 - Simplified data access and discovery from multiple sources for internal teams
 - Faster client ticket turnaround times
 - Elimination of duplicate data submission & processing
- Converted an Excel-VBA based tool into a modern web based UI ([link](#)), resulting in:
 - Reduced client fund data submission errors and fewer support tickets
 - Minimized time of expensive manual interventions
 - Improved fund data intake/processing turnaround time
- Guided asset managers on their fund data submission requirements
- Performed SQL-based data manipulation, cleansing, and reconciliation
- Tools used: SQL, Python, JavaScript, HTML, Jira, DuckDB
